**Medium, *Medium Italic***

**Bold, *Bold Italic***

**Heavy, *Heavy Italic***

Striated was designed with display purposes in mind. Its three weights with their respective italics cater to a variety of application settings, be it in print or on screen. It can be categorised as a mixture between a grotesque and geometric typeface with a pinch of heavily formalised elements.

At its outset, Striated was inspired by a Slab Serif typeface from by the Schelter & Giesecke type foundry, situated in Leipzig, Germany. Nevertheless, it is also clearly rooted in the experiments of the Bauhaus school of design and their pursuit to reduce letterforms to the utmost essential. The attempt of the International Typeface Corporation to capture the spirit surrounding Herbert Bayer and his colleagues at the infamous school in Dessau resulting in ITC Bauhaus, designed in 1975 by Edward Ben-

guat and Victor Caruso, is still ubiquitous, whether directly or indirectly. Also the urge of the Bauhaus to reduce where possible keeps permeating design practice today as one of many approaches.

However futuristic these shapes then may be, due to the heavy exposure in the second half of the 20th century, carried by aspirations to conquer space, the Moon first, and the numerous science fiction stories it spawned – with all their titles calling to be designed – they often seem a bit dusty from today's perspective, which can be used as a design element itself, producing vintage flavoured ephemera.

Striated tries to find a balance in negotiating the past and future by evoking a feeling of being a well known old companion and being forward oriented at the same time.

Release	2022
Weights	Medium, Medium Italic, Bold, Bold Italic, Heavy, Heavy Italic
Version	1.016
